After explaining how the difficulties of coping with the famine were increased by the lack of railway communication, and the fact that nearly all the draught animals had died of drought, the Marquis said: "But the physical circumstances are such that, even if we can prevent any widespread suffering from actual famine
—which I very much doubt—there can
be no doubt that severe epidemics willfollow and complete its work."

TRIALS OF NEWSPAPER MEN.-One of the greatest trials of the newspaper profession is that its members are com-pelled to see more of the shame of the profession is that its members are pelled to see more of the shame of the world than any other profession. Through every newspaper office, day after day, go all the weakness of the world; all the revenges that want to be reaped; all the vanities that want to be puffed; all the mistakes that want to be corrected; all the dull speakers who want to be thought eloquent; all the meanness that want to get its wares not ticed gratis in the editorial columns, in order to save the tax of the advertising order to save the tax of the advertising to be set. ticed gratis in the editorial columns, in order to save the tax of the advertising columns; all the men wanting to be set right who were never right; all the crack-brained philosophers with stories as long as their hair, and as gloomy as their finger nails in mourning because bereft of soap—all the bores who come to stay five minutes, but talk five hours. Through the editorial and reportorial rooms all the follies and shams of the world are seen day after day, and the temptation is to believe in neither God, man nor woman. Some facts are given which seem to impart color to this statement. Of 40,000 men recently setup to Warsaw for inspection, 10,000 were rejected as unfit to serve from various causes, not inclusive of short stature. It has been established by sanitary comhas been established by sanitary com-missions that Russia possesses fewer able-bodied men in proportion than either France or Germany. try every five years or so, and that in several of the northern provinces—Nov-gorod, for instance—83 per cent. of the children born die in their infancy from exposure, accident or unavoidable neg-lect. It is added that many districts are unavoidably exempted from the conscrip-tion on account of the extreme scantiness of their population, which in some cases averages only three to the square mile. Besides these there are large bodies of men in the empire whom it would be unsafe to enroll, such as the disaffected Poles, the Mohammedan Circassians, and the Menonites, who, like the Quakers, have conscientious scruples against fight-

After this had sits every day, and was taken to Newbern Hespital, and there treated by the attending physicians. I grew worze and was sent home. Remained in peer health for four years, treating with many physicians and trying many remedies. Finally scrotlan made its appearance on different parts of my body, and my head was so diseased as to be frightful to look at, and painful beyond endarance. After trying the mast eniment physicians, without improvement, a change of climate was advised.

Have been to the Hot Springs in Arkanast twice, each time giving their treatment a thorough trial. Finally came back to Hoston, discouraged, with no hope of help. Life was a burden to one in my situation. My discase, and the affect of so much powerful medicine, had so damaged my system that the action of no sionnach was apparently destroyed, and my head was covered with ulcers which had in place scatter into the skull bone.

The best physicians said my blood was so fail of poison they could do no more for me. Alout this time a friend who had been an invalid toid moverning the my stomach grew stronger. H. R. Stovens, Esq.: Dear Sir—This is to certify that my daughter was taken sick when she was three years Jd, and got so low that we were obliged to keep her on a pillow, without moving, to keep the little thing together. She was attended by everal physicians—the regular attending one being old Dr. John Stevens. They all pronounced her case incurable. She had been sick about a year, when hearing of the great Blood Remedy, Vegeting, I commenced giving her that, and continued it regularly till she was about seven years old, when she was womenned perfectly cured. During her sickness three pieces of bone were taken from her right arm above the elbow, one of them being very long. Several small pieces were also taken from her left leg. She is now twenty-seven years old, and is enjoying good health, and has ever since she was soven years old, with no signs of Serofula or any other blood disease. Her arm is a little crooked, but she can use it almost as well as the other. Her legs are of equal length, and she is not in the least lame. Her case was Sevofula, inherited in the blood; and I would recommend all those having Serofula Humor or any other blood disease, if they wish to have a perfect care, to try Vegetiez, the teliable blood remedy, which does not be contary, it is nourishing and strengthening. My daughter's case will fully testify this, for I never saw nor heard of a worse form of Serofula. Twenty-Seven Years Ago.

Anderson, July 2, 1877.

This is to certify that I purchased from J. W. Chapman & Co., last Bummer, a No. 4 (9 feet long) Perpetual Evaporator, (galvanized iron,) with which I made over eight hundred gallons of Syrup from Sorghum and Imphee canes. I made, under favorable circumstances, as high as ten gallons per hour, and think that I could make with suitable mill from 75 to 100 gallons per day. The Evaporator is simple in construction, easily operated, and makes an article of Syrup unsurpassed by any other that I have seen. The cheapness, (as compared with others,) greater amount of boiling surface and simplicity of construction, certainly give it the pre-eminence over all others.

JOHN B. WATSON, Agent Pomona Grange, Anderson County, S. C.:

Dear Sir—Yours of the 26th inst., respecting the merits of the "Chapman Perpetual Evaporator, is received. In reply, I used a No. 2 (galvanized) Evaporator last year, at a cost of fifteen dollars, with which I made one thousand and fifteen gallons of molasses, equal in quality to any I have seen. I made from 40 to 50 gallons per day, (i. c., in ten hours.) The labor of making was light and pleasant. It is so constructed that in operating requires but very little labor. much less than that of "Cook's Evaporator." In fact, I feel warranted in saying that from observation and information of others, that the "Chapman Evaporator" has no superior, if an equal, and at less than half the cost. I can certainly recommend it in preference to any other, belog fully convinced that a trial will satisfy any one, however skeptical.

To Patrons of Husbandey.—If we practice our professions in economy and reform, you will buy "Chapman's Evaporator"—the cheapest and the best.

Fraternally yours,

THE BEST PUMP IN THE WORLD

DOUBLE ACTING STONE FORCE PUMP,

Manufactured by J. C. Nichols & Bro., Atlanta, Ga., which brings the water pure and fresh from the bottom of the well. No slime or filth collects on the pump or in the well. No smalls, worms or green mess gets about the water. It is free from rust or other impurities, and can be operated by a small child with ease, and brings the water fresher than any other Pump. It is of stone, glazed inside and outside, and never will decay. It improves the water beyond a doubt by ventilating the well, and keeping it like a moving stream of water. With a hose attached, it becomes a good fire-engine, ever ready at your door to extinguish the flames in case of fire. It is better and cheaper than insurance. Its working gives complete satisfaction, as those acquainted with it will testify.

It is a home enterprise, permanently established, and relies on its own merits, upon which it asks your patronage. This Pump is represented in Anderson and adjoining Counties, together with the Counties of Hart, Elbert, Wilken and Oglethorps in Georgia, by

15 BUSINESS

A ND those who carry on business are compelled to have money. That is our situation at present. Therefore, we carnestly call upon all parties indebted to us to pay at once and SAVE COST. Prompt payment is a great source of friendship, and it is our desire to remain friendly with our customers, if they come forward promptly and pay us what they once. Money we are oblised to have. We offer an inducement of one cent per pound for Cotton over market value to those indebted to us, and wish to settle their Accounts. We have on hand a large stock of

A Good Word for Romping Girls.

Most women have a dread of these Mothers would rather their little daugh ters were called anything else than romps. They say to them, "be very quiet now, my dears, don't run or jump, try and be little ladies." As if a healthy child could be still; as if it could take child could be still; as if it could take thme to walk, or step over what came in its way; as if it could fold its hands in its lap, when its little heart is so brimful of tickle. It is absurd and wrong, because it is upnaturel. Children, girls as well as boys, need exercise; indeed they must have it, to be kept! a healthy condition. They need it to expand their chests, strengthen their muscles, tone their nerves, develop themselves generally. And this exercise must be out of doors, too. It is not enough to have calisthenics in the nursery or parlor. They need to be out in the sunshine, out in the wind, out in the grass, out in the woods, out of doors somewhere, if it be no bigger place than the common or park. Suppose they do tan their pretty faces. Better be as brown as a berry, and have the pulse quick and strong, than white as a lily and complain of cold feet and headache. Suppose they do wear out their shoes; it don't try a mother's patience and strength half so much to watch and mend as it does to watch night a guernlow sick child and it.

her bonnet on one arm and a basket of blackbergies on the other, her curls streaming out in the wind, or rippling over her flushed cheeks, her apron half torn from her waist, and dangling to her feet, her flugers stained with the berries she had picked, and her lips with those she had eaten. Mother, mether don't scold that little creature when she comes and puts her basket on the tablest. and puts her basket on the table and looks ruefully at the rent in the new ginghams apron, and at the little bare toes sticking out of the last pair of shoes. Wash off her hot face and soiled hands, and give her a bowl of cool milk and light bread, and when she has eaten her fill and got rested, make her sit down beside you and tell what ahe her server.

Mrs. Edward Stephens, attended by her cause for congratulation in that they have placed themselves in daily communication with the mountains, and deserve great praise therefor, but I most respectfully submit, Messon. > For generations the bad air of overcombined to render the Russians inferior in muscular power to Englishmen and Germans. Of late years, however, cooking and ventilation have not been neglected by the Russians; their armies are better fed, and the unlimited flogging which once pervailed is virtually abolished. Their devotion to the Emperor is unlimited, and has as much of the fierce enthusiasm of the fanatic in it as the devotion of the Turks to the prophet. No
